

Lab Assignment # 10- Structure and string function

Create structure student with fields (Student_Id, Student_name, OOP1, English, and Maths). Create variable of students where we can store 5 students information. Create menu driven program to stores and retrieve student's details. Menu elements are as follow

- 1: Read Student's Data
- 2: Display Student's Data with total scores and average of scores.
- 3: Search student data based on student Name
- 4: Modify student data based on student Name
- 5: Display details of student who score maximum marks in each course
- 6: Display details of student who average is maximum.
- 7:Exit.
